To whom it may concern, I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that benefits me and other subscribers of their service. Many areas near my home in southwestern Virginia, including western North Carolina, cannot receive an adequate supply of AM and FM signals because the distance from radio stations and the mountainous terrain limits signals. I want XM to keep their current XM weather and traffic coverage and to expand this coverage to other areas of the country.
